IMON

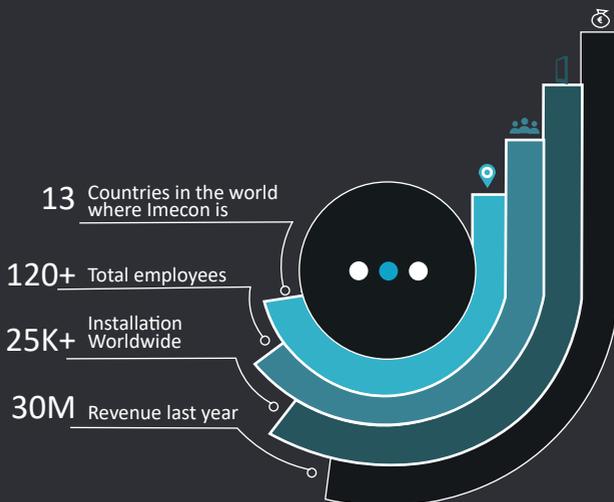

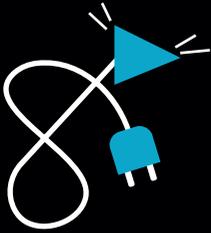

Imecon is an Italian Company that specializes in designing, prototyping and producing advanced technological solutions for Digital Signage. Using mechanical and electronic components to create the most advanced solutions, every item is designed and built in the company's headquarter.

Located in Fiesco (in the Greater Area of Milan), Imecon saw a continuous growth in the last years. It now covers 12.000 Sqm and employs more than 100 people, whose average age is under 35.

In the area of Digital Signage, Imecon has developed a range of products with unique features and which are supported by stringent tests performed at external laboratories to guarantee safety and quality.

In 2018, Imecon has joined **Voilà Holding**. Founded in 1970, the Holding owns branches in 60 Countries in the World, employs 1400 people and makes business for over 300 Million Euros.

PLUG & PLAY

It takes less than a coffee break to configure it: Anima has been developed to be easily and swiftly installed, without any particular requirements. You will only have to place it wherever you want and connect it.

ENDLESS POSSIBILITIES

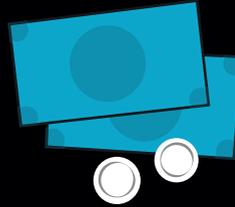

Shops, Hotels, Sport Centres, Hospitals. Designed for indoor locations, the minimal and elegant design of Anima makes the installation of the product easier in any indoor location.

LOCAL OR CLOUD

One to one or group management: Anima can collect your contents locally, via a USB connection and the local TheTail app installed on the device, or via the cloud TheTail software. So simple that a child could do it.

FOR EVERY BUDGET

A modern style totem led by an ad-hoc CMS. A solution installing a Full-HD screen to stream contents with great quality and sharpness. Price is the only entry level feature of this product.

Designed for those who want to install technological solutions for the first time without giving up the "wow effect". Thin and light, ANIMA is the simplest indoor solution ever produced by Imecon. Installable without any tools and configurable by remote control, the device can be installed in a moment without tools. Play FullHD content on a screen that can optimize your surroundings. With a series of available add-ons (from the touch screen to ticket printing), the standard structure has a minimal and elegant design, while containing all the technology in just 10cm. to amaze your customers.
